<b>Deconcentration Policy for Covered Developments</b>			
<b>Development Name</b>	<b>Number of Units</b>	<b>Explanation (if any) [see step 4 at §903.2(c)(1)(iv)]</b>	<b>Deconcentration policy (if no explanation) [see step 5 at §903.2(c)(1)(v)]</b>

**Deconcentration Report**

**The average income of all families residing in each covered public housing development is \$20,062.**

**Our statistical report indicates that four (4) Riverside County sites fall below 85% of the County’s Public Housing average household income. The Riverside County Housing Authority has attributed the lower incomes to the following:**

For the communities in the City of Banning (CA027008):

- This complex is very small, consisting of 14 units, As such evenone household with little or no income reduces the average income dramatically.
- The city is located approximately 45 minutes to one hour’s drive from the City of Riverside, which is the largest population center of the County. The city has relatively few resources. There is a lack of adequate public transportation and employment opportunities.
- The area is identified by census track data to be in an area comprised of high poverty households; therefore the household income reflects the existing population.

For the community of Cathedral City (CA02710):

- This property is very small, consisting of 14 two bedroom units. As such, even one household with little or no income reduces the average income dramatically.
- According the U.S. Census data, the level of education for this community is over 10 percentage points lower than the national average, resulting in lower-paying jobs and lower incomes.

- This community is identified by census track data to be an area comprised of high poverty households; therefore the household income reflects the existing population.

For the community of Midway (CA027021):

- This 40 unit property is also located in an area identified by census track data to be comprised of high poverty households; therefore the household income reflects the existing populations.
- The property is located in an outlying area without effective public transportation to commute to jobs.

To target higher income households would likely deprive local families of needed affordable housing. There are very few higher income families in any of these communities.

**Our statistical report identifies two (2) properties that fall above 115% of the county's average household income. The properties are listed below:**

Scattered Sites (CA027019 and CA027022)

- The scattered site units are comprised of one, two, three and four bedrooms units. Larger bedroom size units have higher household incomes.
- The scattered sites have no private rental communities. Those families who may enter the program at lower incomes remain as incomes increase due to lack of housing options in the area. The property is the only multi-family location available in the area.

We note that while the average household income on these properties is over Riverside County's Public Housing average, they are still well below 40% of the area median income for Riverside County.

The current admission policy for Affordable Public Housing offers applicants a choice of all available units of appropriate size in the region of the county they have requested (East County is defined as the cities east of Beaumont). The incomes at these communities derive directly as a result of economic forces in the geographic areas.
